

## Product references

| Product designation in the protocol                                | CAS number | Supplier reference of the product used in our laboratory |
|--------------------------------------------------------------------|------------|----------------------------------------------------------|
| Agar                                                               | 9002-18-0  | VWR Chemicals ref. 20767.232                             |
| Bacto Agar                                                         | 9002-18-0  | FisherScientific ref. BD 214010                          |
| Bacto Yeast Extract                                                | 8013-01-2  | FisherScientific ref. 212750                             |
| Beef extract                                                       | 68990-09-0 | Sigma-Aldrich ref. 1.03979                               |
| Calcium chloride (CaCl <sub>2</sub> )                              | 10043-52-4 | Sigma-Aldrich ref. C5670                                 |
| Chloroform                                                         | 67-66-3    | VWR Chemicals ref. 22707.295                             |
| Dextrin from corn                                                  | 9004-53-9  | Sigma-Aldrich ref. D2006                                 |
| Ethanol 70%                                                        | 64-17-5    | VWR Chemicals ref. 83801.360                             |
| Ethylenediaminetetraacetic acid (EDTA)                             | 60-00-4    | Sigma-Aldrich ref. E9884                                 |
| Ferrous Sulfate (FeSO <sub>4</sub> )                               | 7782-63-0  | Sigma-Aldrich ref. 215422                                |
| Glass beads (1 mm)                                                 | NA         | Assistent ref. 41401001                                  |
| Glucose (C <sub>6</sub> H <sub>12</sub> O <sub>6</sub> )           | 50-99-7    | Sigma-Aldrich ref. G8270                                 |
| Isoamyl alcohol                                                    | 123-51-3   | VWR Chemicals ref. ACRO126480010                         |
| Isopropanol                                                        | 67-63-0    | VWR Chemicals ref. 20842.312                             |
| Lysozyme                                                           | 12650-88-3 | Sigma-Aldrich ref. L6876                                 |
| Magnesium Sulfate (MgSO <sub>4</sub> )                             | 10034-99-8 | Merk Chemicals ref. 1.05886                              |
| Magnetic Rack                                                      | NA         | MP Biomedicals ref. 116570413                            |
| Manganese Sulfate (MnSO <sub>4</sub> )                             | 10034-96-5 | Sigma-Aldrich ref. M7634                                 |
| Pancreatic Digest of Casein                                        | 91079-40-2 | FisherScientific ref. 211705                             |
| Peptic Digest of Animal Tissue                                     | 91079-38-8 | Merk Chemicals ref. 1.07224                              |
| Peptone                                                            | 73049-73-7 | Gibco ref. 211677                                        |
| Polyethylene Glycol 8000 (PEG 8000)                                | 25322-68-3 | Sigma-Aldrich ref. P2139                                 |
| Potassium acetate (CH <sub>3</sub> COOK)                           | 127-08-2   | Merck Chemicals ref. P1190                               |
| Proteinase K                                                       | NA         | EurobioScientific ref. GEXPRK01-I5                       |
| RNase                                                              | NA         | ThermoFisher ref. EN0531                                 |
| Sera-Mag™ SpeedBead Carboxylate-Modified [E7] Magnetic Particles   | NA         | FisherScientific ref. 11548692                           |
| Sodium acetate (CH <sub>3</sub> COO <sup>-</sup> Na <sup>+</sup> ) | 127-09-3   | Merck Chemicals ref. S8750                               |
| Sodium Chloride (NaCl)                                             | 7647-14-5  | ITW Reagents ref. A2942                                  |
| Sodium Dodecyl Sulfate (SDS 20%)                                   | 151-21-3   | VWR Chemicals ref. 0837                                  |
| Sodium Phosphate (Na <sub>3</sub> PO <sub>4</sub> )s               | 7601-54-9  | Sigma-Aldrich ref. 342483                                |
| Starch                                                             | 9005-84-9  | Sigma-Aldrich ref. S9765                                 |
| Tris-HCl                                                           | 1185-53-1  | Sigma-Aldrich ref. T3253                                 |
| Yeast extract                                                      | 8013-01-2  | BD biosciences advanced bioprocessing ref. 212750        |
