**Title of the Study:** A Worldwide Exploratory Inquiry into the Influence of Globalization on Decision Making

**Principal Investigator:** Nancy R. Buchan (phone: 803-777-1781) (email: nancy.buchan@moore.sc.edu)

**DESCRIPTION OF THE RESEARCH**

You are invited to participate in a research study about how people around the world make decisions. Specifically your decisions will involve people from this local community, from this country and from other countries. You and the others participating in this experiment can make money depending on the decisions each of you make.

You have been asked to participate because we are interested in studying the attitudes and behaviors of people from different parts of the United States, and in different regions within a number of other countries around the world.

This study will include adults of all ages, economic classes, and races from within a number of countries around the world.

The research involves two parts, an experiment, and a questionnaire. The experiment will take place in the meeting room you are about to enter, if you consent to participate in the experiment. After completing the experiment you will be asked to fill out a questionnaire.

**WHAT WILL MY PARTICIPATION INVOLVE?**

If you decide to participate in this research you will be asked to make a series of decisions regarding how to allocate money (given to you by the experimenter). This money will be shared locally, nationally, or with people from around the world. You will also be asked to complete a questionnaire regarding your participation in various activities (for example, the number of times a month you communicate with someone in another country), and regarding your attitudes toward some current issues.

Your participation will last approximately 90 minutes in total.
