

A. Steps in L1-K14 staining using TSA system

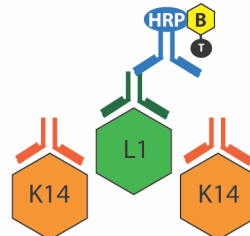

Detection of L1 using unconjugated rabbit- α -L1, then HRP-conjugated 2° antibody

STEP 1

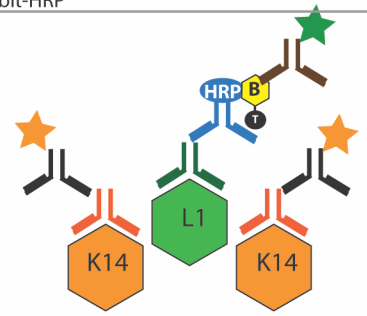

Biotinylation of HRP-conjugated 2° antibody using biotin-tyramide

STEP 2

Detection of K14 using unconjugated Rabbit- α -K14

STEP 3

Detection of K14 using goat- α -rabbit-alexa 594; Detection of L1 using α -streptavidin-alexa 488;

STEP 4

B. L1-K14 staining using TSA system
