CDS Training Week 2023
13 June 2023

Program

Time	Subject
09:00 – 09:15	Introduction
09:15 – 10:00	Collecting and organising interview data
10:00 – 10:15	Break
10:15 – 10:30	Archiving interview data
10:30 – 10:50	Discussion and questions
10:50 – 11:00	Wrap up

Introduction: Centre for Digital Scholarship

CDS Summer Training week 2023

<https://www.digitalscholarshipleiden.nl/articles/cds-summer-training-week-23>

Summer Training Week
June 12th to 16th 2023

Centre for
Digital Scholarship
Universitaire Bibliotheek Leiden

The screenshot shows the CDS website with a navigation menu on the left and a main content area. The 'Data management' section is highlighted in the menu and the main content area. The main content area includes a search bar, a sign-in button, and several featured resources.

Navigation Menu:

- Researchers
 - Open Science
 - Open Access
 - Data management**
 - RDM Checklist
 - Training data management
 - Leiden University Research Data Management Community
 - FAIR data and software
 - FAQ Data Management
 - Use of digital data
 - Copyright Information Office
 - LUCRIS and Scholarly Publications
 - Submitting your PhD dissertation
 - Manage your identity with ORCID
 - Persistent identifiers: DOI
 - Workplaces for researchers
 - Leiden University Press
 - Help on conducting a (systematic) review

Featured Resources:

- Data management**
In short, data management can be defined as the creation, storage, maintenance, disclosure, archiving and sustainable preservation of research data.
- RDM checklist**
Guide to sound data management
- Training**
Courses, workshops, and hands-on instruction
- Research Data Management Community**
Brings together research and support

RDM experts at the CDS:

- Femmy Admiraal
Digital Scholarship Librarian
- Michelle van den Berk
Digital Scholarship Librarian
- Kristina Hettne
Digital Scholarship Librarian
- Dan Rudmann
Digital Scholarship Librarian
- Hannah DeLacey
External PhD candidate

Data Management Calendar:

- 30 MAY Workshop: How to write a Data Management Plan (DMP) Femmy Admiraal
- 12 JUN Summer Training Week Save the date: CDS Summer Training Week
- 06 JUL Workshop: How to write a Data Management Plan (DMP) Femmy Admiraal

DOBES

DOBES > Documentation Projects > Baure

[Baure](#) [Language](#) [Geography](#) [People & Culture](#) [Project](#) [Team](#) [Links](#)

Sessions: 365
Audio recordings: 241
Video recordings: 38
Annotations: 336
Images: 466
Last update: 2017-6-1

The project documents the Baure language group with its three dialects: Baure, Carmelito, and Joaquiniano, spoken in the Bolivian Amazonia. Data were collected for a preceding project from 2003 till 2006 and incorporated to the archive. From 2007 till 2013 the current documentation project is collecting data.

The archive contains audio and video data, historical written data, and current and historical images. The language data are annotated in Toolbox and/or Elan. Furthermore, the doctoral dissertation by Danielsen (2007) on the Baure grammar, the dissertation "Von Geistern, Steinen und anderen Leuten: Das Weltbild der Baure im boivianischen Tiefland" (Ghosts, stones, and other people: The worlds view of the Baure in the Bolivian lowlands) by Franziska Riedel (2012), the MA thesis on the Baure nominal classifier system by Lena Terhart (2010), and a number of research articles are available. The project also developed language learning materials in [books](#) and [digital form](#).

The PI of the project is [Swintha Danielsen](#). Researchers in the team are Franziska Riedel, Femmy Admiraal, Lena Terhart and some more student assistants. [Read more ...](#)

2010 El idioma de los Joaquinianos. Booklet of the Baure project; Swintha Danielsen.

2010 *Chinepinev – Cuentos de los Baure*; book with Baure songs and stories, illustrated by students of two arts colleges in Berlin; (together with the Baure team: Danielsen, Terhart, Admiraal, Riedel, Sell)

Organising and archiving interview data

“The issues that researchers deal with when handling interview data are related to this particular data type and are often domain agnostic.”

- a subtype of qualitative data
- often audio or video recordings are made, results in large-ish files
- difficult to de-identify
- research often focusses on marginalized groups, results in restrictions for access and sharing

Organising and archiving interview data

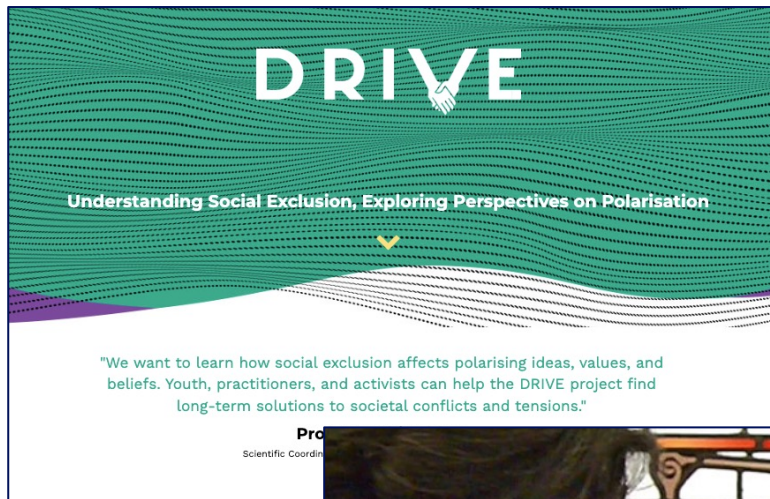

“The issues that researchers deal with when handling interview data are related to this particular data type and are often domain agnostic.”

- a subtype of qualitative data
- often audio or video recordings are made, results in large-ish files
- difficult to de-identify
- research often focusses on underrepresented or marginalized groups, results in restrictions for access and sharing

This session is NOT about: privacy issues, personal/sensitive data, or de-identification. Contact your data steward or privacy officer:

- <https://www.staff.universiteitleiden.nl/ict/help-and-support/helpdesks-and-contact/data-stewards/service-units/leiden-university-libraries?cf=service-units&cd=leiden-university-libraries>

Introduction: you and your data

To which institution are you affiliated?

What is your research field or discipline?

In one sentence, how would you describe your interlocutors?

How would you describe your pre-existing experience with interview data?

Introduction: you and your data

Submit

Go to menti.com and enter the following code: 6799 0217

Collecting interview data: fieldwork

General preparations

- Investigate local conditions (internet access, phone coverage, electricity adapters, weather)
- Remove unnecessary data from your devices and make back-ups

Prepare your data storage

- Prepare folder structure and system for file naming
- Check how and when back ups are made, or make your own provisions

Prepare for your data collection

- Test your equipment
- Prepare your consent form
- Anticipate any legal problems (e.g. data breach)

Prepare your data transfer and sharing

- Install any transfer tools
- Check with local collaborators if they would like access to data or results

Collecting interview data: fieldwork

General preparations

- Investigate local conditions (internet access, phone coverage, electricity adapters, weather)
- Remove unnecessary data from your devices and make back-ups

Prepare your data storage

- Prepare folder structure and encryption
- Check backup options

Prepare for the field

- Test your equipment
- Prepare informed consent form
- Anticipate any legal problems (e.g. data breach)

Prepare your data transfer and sharing

- Install any transfer tools
- Check with local collaborators if they would like access to data or results

Always have a Plan B

CHECKLIST FOR DATA
MANAGEMENT WHEN
WORKING ABROAD

<https://zenodo.org/record/7824907#.ZE-EbexBwUE>

Collecting interview data: online

Do not use tools without processing agreement

This means:

- No Google Drive, Dropbox, WeTransfer...
- No personal accounts for University-provided software like Office365 (Teams, Skype) or Zoom

Contact the information manager of your faculty

<https://www.staff.universiteitleiden.nl/ict/help-and-support/helpdesks-and-contact/information-managers/service-units/leiden-university-libraries?cf=service-units&cd=leiden-university-libraries>

Collecting interview data: informed consent

Rules and guidelines for 'consent'

- Prove the consent was handled well
- Information: clear and accessible
- Subject needs to have a choice (freely given)

Most relevant rights of data subjects:

- Information
- Deletion (Right to be forgotten)
- Rectification
- Right to Object

Consent

Individual has provided genuine, informed, explicit consent to processing of personal data.

Contract

A company can process personal data to fulfil a contractual obligation.

Legal Obligation

If you need to process the personal data to comply with common law or statutory obligation.

Vital Interests

A company can process the personal data to protect someone's life.

Public Task

Processing of personal information by organizations that exercise official authority or serves public interest.

Legitimate Interests

The most flexible lawful ground for processing personal information.

Consent must not only be given for participation in the study, but also for the archiving and sharing of data.

<https://www.staff.universiteitleiden.nl/ict/privacy-and-data-protection/personal-data/informed-consent/service-units/leiden-university-libraries?cf=service-units&cd=leiden-university-libraries>

Organising interview data: file transfer

Surf Filesender

- Send large files (like WeTransfer)
- GDPR-compliant
- Encryption possible!

EduVPN

- Encrypted data transfer
- Protects you on unsecure networks
- Secure access to protected university services
- Download from Surf website.

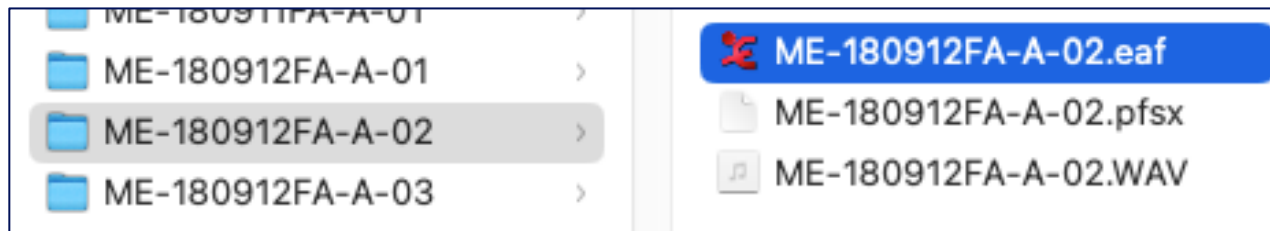

<https://www.staff.universiteitleiden.nl/ict/help-and-support/helpdesks-and-contact/information-managers/service-units/leiden-university-libraries?cf=service-units&cd=leiden-university-libraries>

Organising interview data: file naming

Good file names:

- are unique (not the same names in different folders)
- are consistent (upper/lower case)
- are permanent
- classify broad types of files
- use the format YYYYMMDD
- do not contain personal information

FILENAMING TIPS

- TIP 1: BE BRIEF**
Abbreviate names and place excess info into a metadata log.
- TIP 2: PAY ATTENTION TO CHARACTERS**
Use only letters, numbers, dashes, and underscores. Do not use special characters like parentheses, accent marks or tildes.
- TIP 3: DO NOT USE SPACES**
Instead, use dashes, underscores, or capitalize the first letter of every word.
- TIP 4: DO NOT USE PERIODS**
Use a period only to set off the file format from the rest of the file name.
- TIP 5: FOLLOW THE INTERNATIONAL ARCHIVAL STANDARD FOR DATES**
Represent dates by the 4-digit year, 2-digit month, and then 2-digit day.
- TIP 6: USE LEADING ZEROS**
Number files in a series sequentially using leading zeros for the single-digit numbers.
- TIP 7: PRACTICE VERSIONING**
Distinguish different versions with the letter "v" for version and the version number, making sure to use a leading zero.

Archiving vs. publishing

Archiving

Storing and preserving research data, mostly for verification purposes when such a request arrives.

Data publishing

To publicly disclose research data, making them findable, accessible and reusable.

Long term preservation

Preservation of research data for long term (>10 years, permanently), including a series of managed activities necessary to ensure continued access to digital materials for as long as necessary.

Publishing interview data: community archives

Workflow for making oral history interviews
available for reuse

1. Prepare
2. Process
3. Deposit

• • • Bij deze workflow: Infosheets & Sjablonen

<https://dans.knaw.nl/en/file-formats/>

Accepted file types and formats					
The tables below list the accepted file types and formats in The Language Archive at the MPI for Psycholinguistics. We make a distinction between formats we support for long-term preservation, including format migrations if those formats become obsolete, and formats for which we can only guarantee preservation of the files themselves (bit-stream preservation) for a minimum period of 10 years, without the guarantee that we will be able to migrate them to future formats.					
The listed file extensions are obligatory for deposited files; files will be rejected if their extensions differ from what is specified in the tables.					
Long-term Preservation Formats

FILE TYPES FOR AUDIO RECORDINGS

Preferred

Uncompressed Broadcast Wave File (.WAV) with minimum sample rate of 44.1kHz and bit-depth of 24

Accepted

Moving Picture Experts Group Layer-3 Audio (.MP3) with a minimum bitrate of 160 Kbps

Not Accepted

MPEG 4 Audio (.M4A), Windows Media Audio (.WMA), Free Lossless Audio Codec (.FLAC), Audio Interchange File Format (.AIFF) and others. If you have any questions, please contact us prior to recording

FILE TYPES FOR VIDEO RECORDINGS

Preferred

Uncompressed (.MOV)

Accepted

MPEG-4 (.MP4) or Matroska Video file (.MKV)

Not Accepted

Audio Video Interleave (.AVI), Windows Media Video (.WMV), and others. If you have any questions, please contact us prior to recording

Publishing interview data: licenses & access rights

Access rights

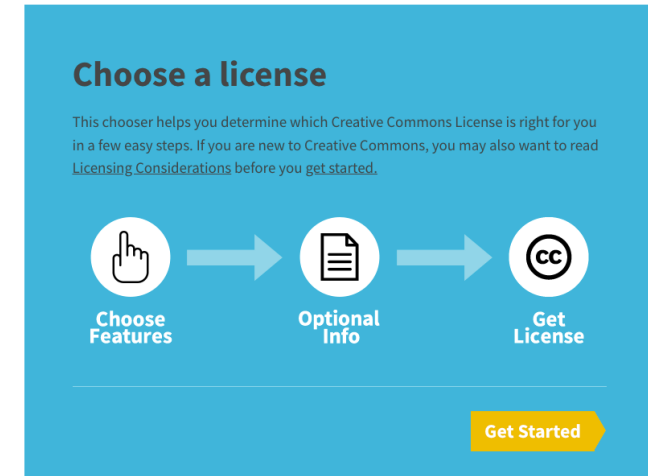

- Who can and cannot access your dataset and under what conditions
- Most repositories offer options for restricted access rights

Publishing interview data: licenses & access rights

Licences

- Formalize the conditions under which your data may be reused (e.g. CC-BY)
- Repositories usually offer a limited set, but the elements are often similar.

<https://creativecommons.org/>

Connect & Share (Thursday 15 June, 9.30-11.00)

Licences and Access Rights: How to Set the Appropriate Conditions for your Dataset

Publishing interview data: decision tree

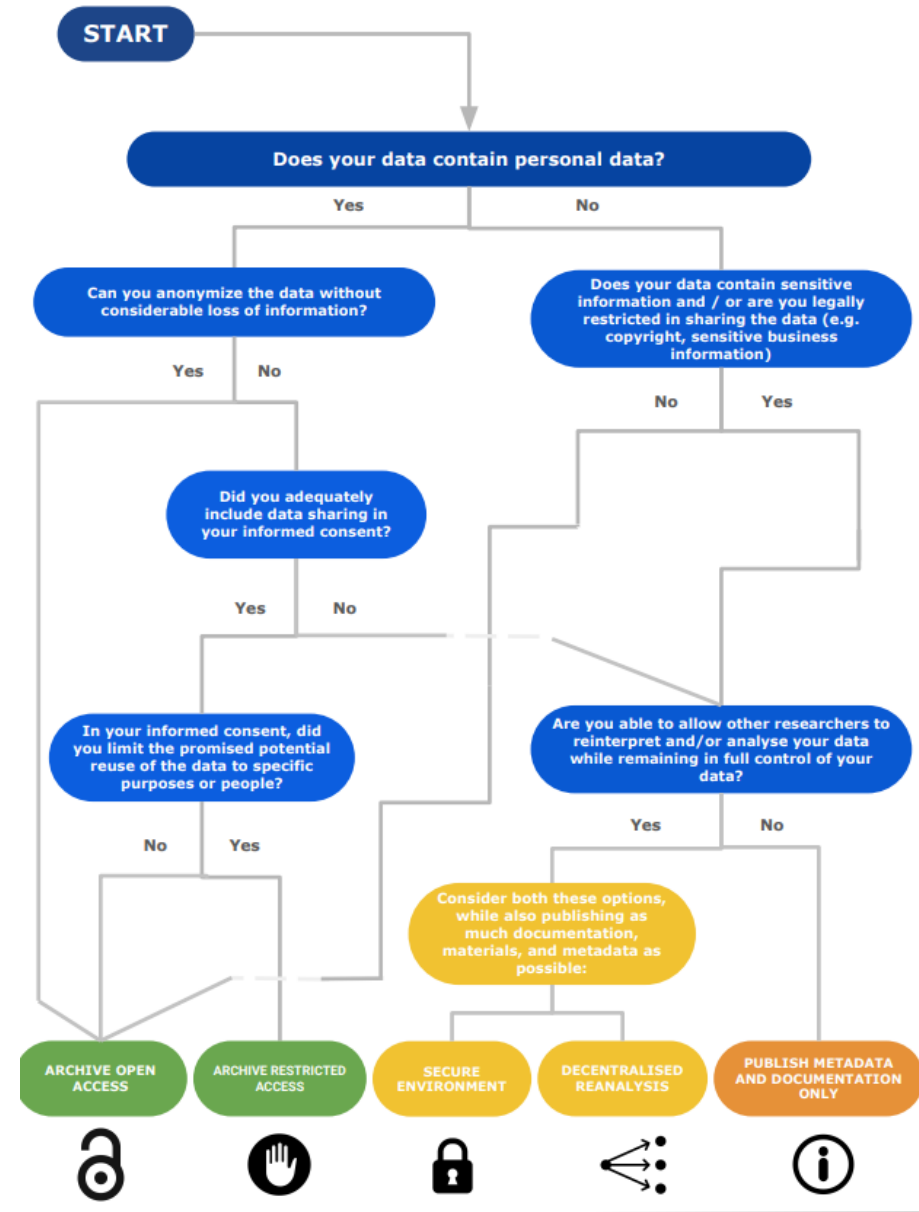

<https://zenodo.org/record/7777549>

<https://www.nwo.nl/en/projects/203001153>

Qualitative data reuse decision tree

as open as possible, as closed as necessary

Publishing interview data: is it worth the effort?

- Contextual information is missing
 - De-identifying audio or video data is time consuming
 - Processing (de-identification) may lead to information loss
-
- + Acknowledgement or recognition for interlocutors
 - + Archiving in a trusted repository may provide options for analysis in secure environments in the future
