AGENDA

- TRUST overview
- An update on the progress of the TRUST principle
- Outreach activities
- How you can help

TRUST OVERVIEW

Transparency about specific repository services & data holdings

Transparency

Responsibility

User focus

Sustainability

Technology

Responsibility for ensuring authenticity & integrity of data holdings; for reliability & persistence of its service.

User Focus - ensure that data management norms & expectations of target user communities are met.

Sustainability - of services & preserve data holdings for the long-term.

Technology - provide infrastructure & capabilities to support secure, persistent, and reliable services.

WIDE. OPEN. SCIENCE.

UPDATES

Create, administer and analyze survey on principle to standards hesitancy and report findings

Collect, analyze and report on case studies

Map TRUST to certifications

Create and test guidelines and self-assessment on implementing TRUST

Create, launch and update Wiki on TRUST

- Support from RDA TIGER
- Survey created, in IRB
- Collect of case studies
