HULib Data Team/UH Data Support

In 2020, the Research Council of Finland changed its DMP submission process:

- 1) The DMP has to be submitted only by those applicants who receive a positive funding decision.
- 2) The RPO is responsible for ensuring that the DMP can be implemented and that the measures taken are in line with good data management practice.

The UH receives approximately 100-130 positive funding decisions in relation to the largest funding call of the year - **how do we manage the DMP review process at the university level?**

TRANSPARENCY	TRUST	NEW SERVICES	NEXT STEPS
• All relevant stakeholders from the university have been involved in the process design and communicate with each other during the process. • DMP Coordinators from the library's DMP team follow the daily workflow and DMP reviewers update their activities in relation to the workflow. • The DMP Coordinators are responsible for ensuring that all DMPs are marked as reviewed in the project management system when the review is complete. • Financial Services will contact the researcher if the DMP hasn't been reviewed - otherwise the project funding will not start.	• Clear roles between different stakeholders • Research Services - general communication of the DMP process to university units • Library DMP team - DMP sections: general description, ethical and legal compliance, documentation and metadata, opening, publishing and archiving, responsibilities and resources • IT Services – DMP section: storage and backup • Lawyers and data protection consultancy available. • DMP review is a priority - everyone knows +100 DMPs need to be reviewed within a certain timeframe.	• DMPs from the EU funded projects will follow the same review process. • My Research service v. 1.0 for UH researchers to be launched in 2024 • Research planning and all relevant documents related to research projects in one service for researchers and UH administration (for lawyers, ethical review, DMP review etc.).	• September call has changed to Winter call; • In June 2024, almost all decisions will be announced at once and about + 100 DMPs will be reviewed in 8 weeks, previously 12-14 weeks. • Implementation of the UH's Research Data Policy : “A data management plan is to be drawn up for all research projects”. • Integrations: My Research service with the DMPTuuli (DMPonline for the Finnish research community). DMP Tuuli • Development of maDMP template together with the national DMP consortium.
