

Protocol for data collection for association data between VEMP in the time domain and the frequency domain.

I. Registration chart no.

0	1	2	3	4	5	6	7	8	9
0	1	2	3	4	5	6	7	8	9
0	1	2	3	4	5	6	7	8	9

Otologic history Ear infections (more than three episodes/year): Y () N ()

Use of ototoxic medication: Y () N ()

Ear surgery: Y () N () Type: _____

Ringing in the ears, vertigo, dizziness or other vestibular-cochlear disorders:

Y () N ()

Hereditary deafness: Y () N ()

Exposure to occupational or leisure noise

Y () N ()

If yes, minimum weekly exposure time:

General health status Diseases:

Medications: _____

Hormonal alterations: Y () N ()

Inspection of external auditory canal.....

() Normal () Altered

Y=Yes, N=No

Date: _____ Date of birth: _____

Sex: F () M () Telephone: _____

E-mail: _____

Address: _____

II. VEMP in the time domain

Stimulation rate () 5,1 stimulations/s
() 10,2 stimulations/s
() 20,4 stimulations/s
() 40,8 stimulations/s

Intensity 95 dBNA

		p13	n23
RE	Latency		
	Amplitude		
LE	Latency		
	Amplitude		

RE= Ear right, LE= Ear Left

II. VEMP in the time frequency

Carrier frequency 500 Hz

Modulated frequency 40 Hz

		p13	n23
RE	Absent		
	Presence		
LE	Absent		
	Presence		

RE= Ear right, LE= Ear Left
