

Consent form

We investigate the subjective certainty within the diagnostic process of physicians.

I agree to participate in this study „The role of subjective confidence when making a diagnosis in medical practice“. I will be asked to watch video case-based sequences of a patient and to make suspected diagnoses.

I take note that all individuals involved in this research project are bounded to professional discretion. All my data will be used and processed anonymously. Participation in this study is voluntary. I am entitled to interrupt or abandon this study at any time and without having to state a reason.

With my signature I declare that I have read this consent form, and that I have well-understood the content and procedure of this study. I had the possibility to ask comprehension questions, and those had been answered in a satisfactorily manner.
